## Science Center Seen Creating 60,000 Jobs

Author: Unknown

Periodical: *The Evening Bulletin*                      Date: August 24, 1966  
Location: Temple University Libraries, Urban Archives, Philadelphia, PA  
Envelope: University City Science Center High School

The new \$6 million science center to be built in University City may create 60,000 new jobs here, W. Thacher Longstreth, executive vice president of the Chamber of Commerce of Greater Philadelphia, said today.

Longstreth spoke at the opening of a four-day annual convention of the National Technical Association, Inc., at the Sheraton. Some 3,000 engineers and scientists are expected.

The association was formed in 1926 by a group of Negro engineers to help Negroes and other minorities prepare for technical and scientific careers.

### **Job Ratio**

Longstreth said the center will create jobs on a 12-for-one basis: for every new job created at the center itself, he said, 12 others will be created in the city by its work.

He said the center may well create 5,000 new jobs there, leading to 60,000 in the city.

However, he added, other leaders, concerned about lack of jobs, will realize that relocation is necessary if new employment opportunities are to be created.

Mayor Tate, who was scheduled to deliver the opening keynote address, was represented instead by William H. Lindsay, deputy commissioner of licenses and inspections.

Lindsay told the delegates that a shortage of civil and mechanical engineers exists here now.

### **Goals Outlined**

Samuel R. Cheevers, national president, outlined the organization's goals as follows:

Increased efforts to help Negro youth prepare for technical and scientific careers; dissemination of information to young people through workshops, radio, television and other means on opportunities in these fields; starting of a national scholarship program; advancement of

architecture, science and engineering by conventions, seminars and discussion groups, and work to remove all restrictions to professional growth based on race, religion and nationality.

# Science Center Seen Creating 60,000 Jobs

The new \$6 million science center to be built in University City may create 60,000 new jobs here, W. Thacher Longstreth, executive vice president of the Chamber of Commerce of Greater Philadelphia, said today.

Longstreth spoke at the opening of a four-day annual convention of the National Technical Association, Inc., at the Sheraton. Some 3,000 engineers and scientists are expected.

The association was formed in 1926 by a group of Negro engineers to help Negroes and other minorities prepare for technical and scientific careers.

### Job Ratio

Longstreth said the center will create jobs on a 12-for-one basis: for every new job created at the center itself, he said, 12 others will be created in the city by its work.

He said the center may well create 5,000 new jobs there, lead-

ing to 60,000 in the city.

He warned that an "outcry" may result, especially from some civil rights groups, when low-income families are moved out of the area to make room for the center.

However, he added, other leaders, concerned about lack of jobs, will realize that relocation is necessary if new employment opportunities are to be created.

Mayor Tate, who was scheduled to deliver the opening keynote address, was represented instead by William H. Lindsay, deputy commissioner of licenses and inspections.

Lindsay told the delegates that a shortage of civil and mechanical engineers exists here now.

### Goals Outlined
