

40<sup>TH</sup> ANNIVERSARY CELEBRATION of  
UNIVERSITY CITY HIGH SCHOOL  
1971-72 + 2011-12

## Longstreth Sees Momentum for Area as Science Center

Author: Unknown

Periodical: *The Evening Bulletin*                      Date: June 14, 1967  
Location: Temple University Libraries, Urban Archives, Philadelphia, PA  
Envelope: University City Science Center High School

Thacher Longstreth, executive vice president of the Greater Philadelphia Chamber of Commerce, predicted yesterday that this area will become an important center for both aerospace and underwater sciences.

He said these fields will grow here “even if left alone, but we are giving them momentum.”

Longstreth spoke at a luncheon opening an exhibit of electronics equipment by Almo Industrial Electronics, Inc., at the Philadelphia 1700 Restaurant, at Pier 37 North.

He said Philadelphia, with its University City Science Center, “is trying to duplicate artificially the type of community and research facilities that grew up naturally in Boston and put that city on the map as an aerospace center.”

Longstreth pointed out that a magnet science school proposed for the University City complex will encourage youngsters to go into science fields.

The school, he said, will attract to that area “the smartest, most ambitious kids... and also to draw in Negro kids never exposed to science and its challenges.”

Longstreth also urged companies in the field to “get into the social problems plaguing the area” and help improve the community.

The exhibit is open until 9 tonight.
